

UNC
HOSPITALS

Dear new patient,

Thank you for choosing UNC Health Care! At the UNC Hospitals' Spine Center, you will receive an interdisciplinary team approach to your Spine Care. We have board certified specialists in Physical Medicine and Rehabilitation, Orthopaedic Surgery and Neurosurgery. Our team is complemented with specialized spine physical therapy and we have access to world class complementary medicine here at UNC.

We provide both conservative and surgical approaches to spine management. Our goal is to increase your functional ability. Whether you want to return to the golf course or simply hope to be more comfortable working in front of a computer, we will provide you with the most current evidence-based treatments. In addition, you will receive all of your treatments at one convenient location.

To ensure patient safety, we do not routinely prescribe pain medications. We also do not perform disability assessments. If you feel that you need chronic medical pain management or need a disability assessment, please contact your primary care provider to arrange a visit with a more appropriate provider.

We look forward to giving you first class care at UNC. Please visit our website at <http://www.uncimagingandspine.org> for more information.

We've got your back,

The UNC Spine Team
