

## Allison Blackmer

PGY2 Pediatrics Specialty Resident

**Undergrad:** New York University

**PharmD:** University of Illinois at Chicago--College of Pharmacy

**PGY1:** University of North Carolina Hospitals

**Research Project:** An Evaluation of the Accuracy of Neofax Gentamicin Dosing Recommendations

“UNCH is a great place to be a resident for many reasons including the ability to be involved in a variety of pharmacy practices: clinical practice, research, and academia. As a pharmacy resident, I feel well respected and well integrated into the multidisciplinary team... and, the preceptors are truly amazing!”

## Stacy Eon

PGY2 Psychiatric Specialty Resident

**Undergrad:** Baylor University

**PharmD:** Purdue University

**PGY1 Residency:** Moses H. Cone Memorial Hospital, Greensboro, NC

**Research Project:** Implementation of the Illness Management and Recovery (IMR) treatment model on an inpatient adult psychotic unit: Use of pro re nata (PRN) medications and additions to medication regimens.

“I love UNC because there are outstanding clinical specialists to learn from. Also, as I move forward next year and leave UNC, I know that I will always be able to rely on the pharmacists at UNC to give me advice and support. Finally, I love being a resident at UNC because our cafeteria serves delicious burrito bowls.”

## Lisa Fletcher

PGY2 Infectious Diseases Specialty Resident

**Undergrad:** Purdue University

**PharmD:** Purdue University

**Residency Training:** PGY1 at Wishard Health Services/Purdue University

**Research Project :** Comparison of high-dose and standard dose daptomycin on clinical outcomes

“I am really passionate about teaching and the UNC residency’s close relationship with the school of pharmacy gives me different types of teaching opportunities, such as, a faculty appointment at UNC teaching pharmacy skills lab, assisting with the ID elective class, and teaching various lectures. The opportunity for varied learning experiences with a number of highly trained clinical specialists makes for an ideal training environment. Specifically I work with several ID clinical specialists that specialize in different areas and allows me to maximize my training.”

## Alex Ganetsky

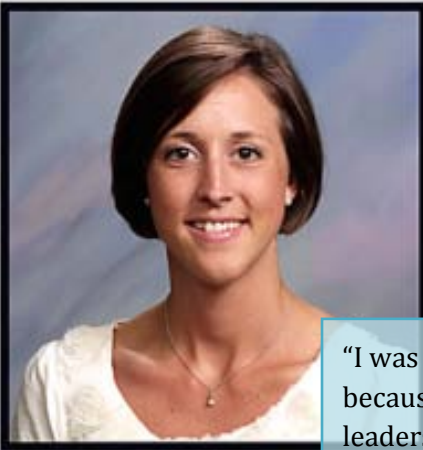

PGY1 Pharmacy Practice

**Undergrad:** Temple University

**PharmD:** Temple University

**Research Project:** Effectiveness of empiric gram negative double coverage in patients with febrile neutropenia

“UNC cultivates a special relationship between the clinical specialists and residents, providing a great learning environment to refine your clinical, research, critical thinking, and interpersonal skills.”

## Kate Gerrald

PGY2 Ambulatory Care Specialty Resident

**Undergrad:** University of South Carolina

**PharmD:** University of South Carolina

**Residency training (PGY1):** Wake Forest University Baptist Medical Center

**Research Project:** Incorporation of Home PT/INR Testing into an Established Anticoagulation Clinic

“I was drawn to UNC for my specialty training for numerous reasons, but especially because of the experiences available to me. The preceptors training us are national leaders in their fields and provide us many opportunities to advance our careers. There is also great emphasis placed on mentorship and group unity which has created lifelong friendships for me.”

## Nathan Gerrish

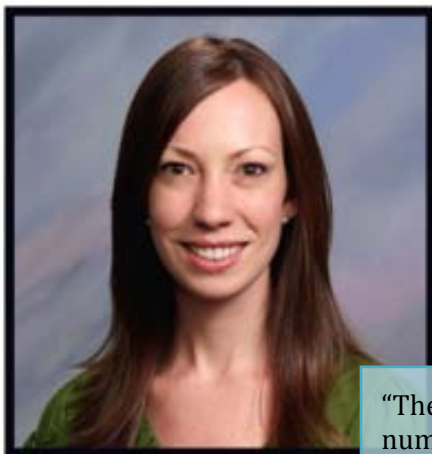

PGY1 Health System Pharmacy Practice Administration/MS

**Undergrad:** Michigan State University

**PharmD:** University of Michigan

**Research:** Implementation of a standardized patient care handoff between shifts in a decentralized pharmacy model

“Being a resident at UNC is great because it affords you any opportunity that you could possibly want. There are many great preceptors who can guide you to success in whatever you want to do.”

## Kelly Gregory

PGY2 Hematology/Oncology Specialty Resident

**Undergrad:** University of Illinois

**PharmD:** Purdue University

**PGY1:** UNC Hospitals

**Research** - Impact of an oral leucovorin and outpatient monitoring protocol on length of stay after high-dose methotrexate administration

“The teaching-focused atmosphere at UNC is energizing and has provided me with numerous opportunities for involvement in meaningful and unique teaching and research efforts. The camaraderie between residents is also truly special – the relationships I have made here are invaluable.”

## Emily Heil

PGY1 Pharmacy Practice Resident

**Undergrad:** University of North Carolina at Chapel Hill

**PharmD:** University of North Carolina at Chapel Hill

**Research Project:** An open-label dosing study of doripenem in patients with end-stage renal disease receiving hemodialysis

“I love being a resident at UNC because of the close affiliation with the UNC Eshelman School of Pharmacy which allows for an abundance of teaching opportunities. In addition, the level of mentorship at UNC is also unsurpassed. We may be a large program, but we are like a big family and have a great support system.”

## Alexander Jenkins

PGY2 Health System Pharmacy Practice Administration/MS

**Undergrad:** William and Mary

**PharmD:** UNC

**PGY1 Residency:** UNC Hospitals Masters Program

**Research Project:** Utilization of the Baxa ExactaMix 2400 Compounder for Preparation of Chemotherapy Compounded Sterile Preparations

“I grew up in North Carolina and I loved it so much that I had to come back after a brief 4-year hiatus to get my PharmD and residency training. With great people, great weather, and a great basketball team, you can’t ask for a better area to do a residency.”

## Whitney Maxwell

PGY2 Pharmacotherapy/Family Medicine Specialty Resident

**Undergrad:** Mercer University

**PharmD:** Medical University of South Carolina

**PGY-1 Residency:** University of Virginia Health System

**Research Project Title:** Effect of pharmacist intervention on medication discrepancies and healthcare resource utilization at transitions of care

“I feel so thankful to be a UNC resident because I am being coached by experts who are truly committed to my professional development and success. I appreciate being trained and challenged by preceptors with a very strong commitment to teach and practice evidence-based medicine.”

## Abigail Miller

PGY2 Cardiology Specialty Resident

**Undergrad:** University of North Carolina at Chapel Hill

**PharmD:** University of North Carolina at Chapel Hill

**PGY1:** University of North Carolina Hospitals

**Research Project:** The use of a heparin correlation for the management of heparin nomograms

“Having spent time at UNC as a student, I knew what the department and the residency program had to offer—and although I looked broadly, I couldn’t find another place that could match UNC. What I love most?? The people! I love the UNC residency family, and the support we have from all of our preceptors and mentors.”

## Cameron Mitchell

PGY1 Pharmacy Practice Resident

**Undergrad:** North Carolina State University

**PharmD:** University of North Carolina at Chapel Hill

**Research:** Effect of Illness Management and Recovery (IMR) Implementation on Antipsychotic Exposure in the Acute-Care Psychiatric Setting.

“After completing my 4<sup>th</sup> year pharmacy school rotations at UNC Hospitals and Clinics, I knew that it was the right place for me. The preceptors and faculty at UNC foster a great environment for learning by encouraging resident autonomy and imparting just the right amount of direction. “

## Lindsey Poppe

PGY1 Health System Pharmacy Practice Administration/MS

**Undergrad:** University of Wyoming

**PharmD:** University of Wyoming

**Research Project:** Retrospective evaluation of the clinical and financial impact of blood factor usage guidelines

“Being from Nebraska, it was important to me to have the support that would make NC my home-away-from-home. I was immediately brought into the “UNC family” and feel like I’m a vital member of the department. Combined with the willingness of the clinical and administrative preceptors to tailor each rotation to my interests, I love coming to work every day.”

## Brent Reed

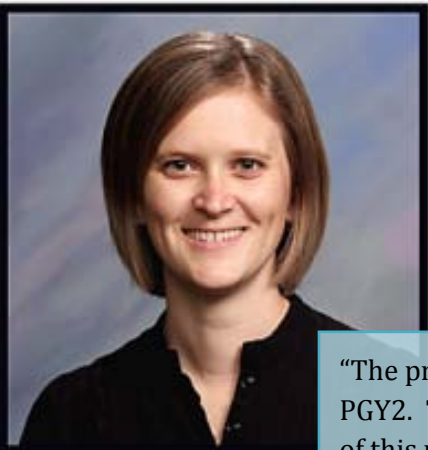

PGY1 Pharmacy Practice

**Undergrad:** University of Tennessee

**PharmD:** University of Tennessee Health Science Center

**Research Project:** Effects of Intravenous vs. Oral Magnesium Replacement in Patients with Cardiovascular Disease

“The features that drew me to the residency program at UNC included its outstanding reputation as an academic health center as well as its emphasis on mentorship and professional development. At UNC, I felt I would not only become a better practitioner, but also a better learner, mentor, and actively engaged member of my profession.”

## Ashley Rosenquist

PGY2 Critical Care Specialty Resident

**Undergrad:** University of California Santa Cruz

**PharmD:** University of California San Diego

**PGY1 Residency:** UNC Hospitals

**Research:** Incidence of Renal Failure in Surgical Intensive Care Unit Patients following Co-administration of Vancomycin and Piperacillin/tazobactam

“The preceptors at UNC are a big part of the reason I came to UNC and stayed on for a PGY2. The clinical specialists are extremely dedicated to teaching and are a large part of this program’s continued success. Also, Clinical Pharmacy at UNC Hospitals is an expectation. The physicians and other members of the healthcare team depend heavily on clinical pharmacists.”

## Erinn Rowe

PGY2 Health System Pharmacy Practice Administration/MS

**Undergrad:** University of Georgia

**PharmD:** University of Georgia

**PGY1:** UNC Masters Resident

**Research Project** – Utilization of a closed system transfer device to extend the sterility data of single dose chemotherapy vials

“I have enjoyed being a resident at UNC because of the passion everyone has for pharmacy. UNC has such a rich history with the Masters program and having the opportunity to reinstate it last year with Alex Jenkins has been a unique experience. I have enjoyed the opportunity to contribute to many large scale projects which have impacted both the Department of Pharmacy and the entire hospital. Most importantly, the mentorship that UNC offers will serve me for my entire career and I am so fortunate to have such special people surrounding me.”

## Moo Sultan

PGY2 Critical Care Specialty Resident

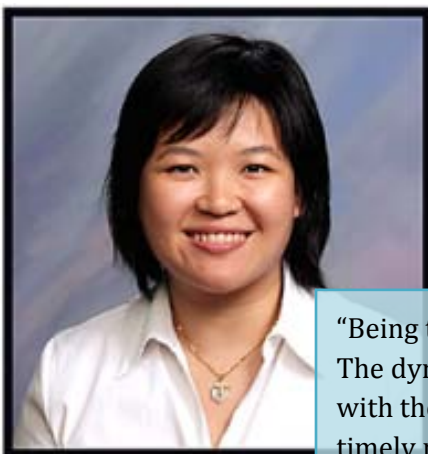

**Undergraduate:** East Carolina University BS

**PharmD:** Virginia Commonwealth University School of Pharmacy

**PGY1 Residency:** UNC Hospitals

**Research:** Initiation of Diabetic Ketoacidosis and Hyperglycemic Hyperosmolar State Protocol at UNC Healthcare

“UNC Healthcare has a great variety of what I enjoy! It gives me the opportunity for patient care, teaching and fellowship!”

## Caroline Tee

PGY2 Infectious Diseases Specialty Resident

**BSP Pharm:** National University of Singapore

**Research:** Relationship between vancomycin concentrations and nephrotoxicity in hospitalized patients – does the combined use of piperacillin/tazobactam make a difference?

“Being the very first international resident at UNC-Chapel Hill has been a real privilege. The dynamic clinical specialists in action, the great rapport and definitive role we have with the medical team, the efficient electronic systems that optimizes patient care in a timely manner and our involvement as teaching assistants with the school of pharmacy has made this a very conducive environment for me to learn, grow and further develop my potential as an ID clinical specialist. Not to mention the wonderful preceptors and residency directors that have been most kind to me, and the incredible group of fellow residents to have on this exciting journey, bonding through "adversity" of deadlines, projects and seminars and also through our numerous "bonding weekends". This is going to be one of the best years in my life!”

## Jennifer Thackray

PGY1 Pharmacy Practice

**Undergrad:** Oklahoma State University

**PharmD:** University of Oklahoma Health Sciences Center College of Pharmacy

**Research Project:** Perioperative antibiotic prophylaxis for prevention of ventriculoperitoneal shunt infections in children

“UNC is a great place to do a residency because it offers a dynamic atmosphere for medication therapy management. Pharmacy is a critical and integral part of the UNC healthcare team that encourages the residents’ involvement in several aspects. UNC’s clinical pharmacy department fully supports the work and the teaching of the residents. It feels really good to know I am being trained by some of the best preceptors in the nation and that they truly want me to be a successful practitioner when I leave here.”
