

Attention Motorists:

The right-hand lane of southbound traffic on Pittsboro Street (between the Carolina Inn and Miller Hall) will be closed beginning Monday, January 18 and will remain closed for approximately 18 months due to the CoGeneration Steam Tunnel construction project. Traffic will be maintained via the left southbound lane, though some traffic congestion is expected to occur.

The Chapel Hill Transit (CHT) bus stop located in front of the Newman Center is being relocated approximately 200 feet to the north in an area where both lanes are open.

Thank you for your understanding and cooperation. Please call the Department of Public Safety at 962-3951 during normal business hours with other questions or concerns.
